## Mark Duntemann

---

***Tree risk assessment and risk management are a critical component of any municipal tree or urban forestry program.***

TWAC is thrilled to have the industry leader in tree risk assessment, Mark Duntemann, lead the workshop attendees through this all-day intensive workshop. Mark Duntemann is the owner of Natural Path Urban Forestry Consultants. Mark is an International Society of Arboriculture (ISA) Board-Certified Master Arborist (RM 131B) and instructor for the ISA's Tree Risk Assessment Qualification.

Mark's primary focus is on developing tree risk management policies for government agencies and private sector companies. He provides tree risk management guidance on projects in North and South America, Asia and Europe. He presents internationally on topics of tree risk and urban forestry policy development and is currently researching a book on the topic of tree risk management. Mark serves as an expert witness in numerous tree-related litigation cases and uses this experience to inform his perspective on tree risk.
